Professional Summary

Frontend Developer with 2 years of professional IT experience, specializing in **Angular** and **Vue** for building scalable, user-friendly enterprise applications. Previously worked as a **Full Stack Developer** with **Java Spring Boot** and MVC architecture, developing transactional systems. Strong background in **CRUD** development, **dashboard visualization**, **PDF/file management**, **Text Editor Integration**, and **enterprise-scale** solutions. **Open to global remote opportunities.**

Technical Skills

- Frontend: Angular (v16–20), Vue 3, TypeScript, JavaScript (ES6+), HTML5, CSS3, Angular Material, Vuetify, Bootstrap, TinyMCE, Only Office, CK Editor, ApexCharts, Chart.js,
- Backend: Java (Spring Boot, MVC)
- Database: MSSQL, PostgreSQL, ORACLE
- Tools: Git, Docker, GitLab CI/CD
- Others: REST API, Agile/Scrum, jsPDF, XLSX, DOCX, UI/UX, Figma

Professional Experience

Frontend Developer – Indocyber Global Technology

2024 – Present

Worked on multiple enterprise-scale projects for PLN (Indonesia's state-owned electricity company) using Angular and Vue.

- AMS Corporate System – PLN (Angular + TypeScript + TinyMCE + PDF)
 - Developed internal correspondence system for corporate document workflows.
 - Integrated TinyMCE editor for rich-text editing and PDF generation features.
 - Implemented and file upload and document validation modules.
 - Upgraded **Angular** from v14 to v18 for better performance and maintainability.
 - Built interactive dashboard using Apex Chart
- BDCT – Business Development Control Tower (Vue + ApexCharts + TypeScript)
 - Built master CRUD modules using reusable components.
 - Developed interactive dashboards using ApexCharts for business monitoring.

- PMO – Program Management Office (Angular + Angular Material + ApexCharts)
 - Created master CRUD systems for project management data.
 - Developed dashboards using Apex Charts.
 - Implemented consistent design using Angular Material components.
- DARAMONITA – Budget Dashboard & Invoice Monitoring (Vue + Vuetify)
 - Designed and implemented responsive UI using Vuetify.
 - Developed dashboard modules for budget and invoice tracking.
- SEKPER PLN Portal – Website Portal for internal PLN APP (Vue + Vuetify)
 - Designed and implemented responsive UI using Vuetify.
- DAMS – Digital Asset Management System (Vue + TypeScript + Vuetify)
 - Developed and implemented responsive user interfaces by translating complex UI/UX designs into high-quality, reusable Vue components.
 - Implement Photos, Video, and Document Viewer

Full Stack Developer – Indocyber Global Technology

2023 – 2024

Developed a Library Management System using Java Spring Boot (MVC) for backend and JavaScript for frontend.

- Built modules for book catalog, user management, and borrowing/return transactions.
- Implemented secure authentication with JWT.
- Developed transactional logic for borrowing and penalties.
- Designed relational database schema in MSSQL Server.

Education and Training

Full Stack Developer Bootcamp – Indocyber

- Learned Java programming with Spring Boot and MVC architecture.
- Built web applications using Thymeleaf, HTML, CSS, and JavaScript.
- Worked with Microsoft SQL Server (MSSQL) for database design and queries.
- Developed end-to-end CRUD applications integrating backend and frontend.

Bachelor Of Engineering / Physics Engineering – Telkom University – 2016 - 2020

Projects (Personal / Open Source)

- Blissful Bite (Java MVC) – Restaurant Menu Order, Menu management, Payment Management.
- Troll Market (Java MVC) – Marketplace site with JWT Security and product management.
